ABOUT ME

I am a passionate and self-motivated Full Stack Developer with hands-on experience in building web applications, solving real-world problems, and developing creative digital solutions.

With a strong foundation in *Java, Spring Boot, Node.js, React, MongoDB, and MySQL*, I constantly improve my skills through projects, freelance work, and continuous learning.

I excel in collaborative environments, follow clean coding principles, and enjoy building modern, scalable, user-friendly applications. My goal is to contribute to innovative tech solutions and grow as a professional software engineer.

EDUCATION

2023 – Present University of Colombo	Bachelor of Information Technology 3rd year Ongoing
Bolton University (UK) Second Year	BSc Computer Science
2020 Kalaniya Sri Darmaloka Collage	GCE Advanced Level – Maths Stream

PROJECT

- Coffee Shop POS Web Application** – HTML, CSS, JavaScript
Developed a web-based POS system for managing coffee shop orders, product selection, and automatic price calculations with a clean, responsive UI.
- GovSlove-DMT Services Mobile App** – Flutter, Dart
Built a mobile application to guide users through Sri Lankan DMT services including vehicle registration and license-related workflows.
- Government Services Guidance System** – NestJS, MongoDB, Flutter, React
Developed a full-stack platform providing step-by-step guidance for government services with authentication, multilingual support, and notifications.
- Hotel Management System** – Java, Spring Boot, MySQL
Implemented a hotel management system with room booking, customer management, payment tracking, and admin dashboard features.
- Strategic Patient Risk Stratification & Readmission Prediction System** – Python, Pandas, NumPy, Matplotlib
Developed a data-driven predictive analytics system to reduce 30-day hospital readmissions for diabetic patients using large-scale clinical datasets. Designed the Vitality Complexity Index to stratify patients into low, medium, and high readmission risk groups, delivering actionable healthcare insights.
- Clothing Brand Store – Full Stack E-Commerce Application** – React, TypeScript, Tailwind CSS, Redux Toolkit, Node.js, MongoDB
Built a full-stack e-commerce platform with secure authentication, product management, and order processing. Implemented responsive UI, JWT-based authentication, role-based access control, and scalable clean architecture following Rapid Application development principles.
- SmartGrocer (Advance Mobile Application Development Grocery App)** – React Native, JavaScript
Developed a mobile grocery application for product browsing, cart management, and order placement. Implemented smart grocery lists, real-time item tracking, automated stock reminders, and performance-optimized UI for real-world usability.

EXPERIENCE

Code Hello Pvt Ltd – Software Development (Remote)

2022 – Present

- Contributed to multiple web development projects using Java, Spring Boot, JavaScript, and modern front-end frameworks.
- Integrated REST APIs, enhanced UI/UX components, and optimized system performance.
- Participated in code reviews, debugging, and continuous learning to improve team productivity and code quality.

Earth University Model – Mathematics Demonstrator

Jan 2022 – Dec 2022

- Worked as a Mathematics Demonstrator, assisting students with problem-solving, explaining mathematical concepts, and supporting academic activities.

SKILLS

Technical Skills - Dart, C, Java, C#, Flutter , React, Html, Css, Php, Js, Python, Spring Boot, MySQL, MongoDB, Figma
Soft skills - Problem solving, Public Speaking, Time Management, Event Management, Teaching , Video & Photo Editing, Team collaboration.
